

FILTERMAX FILTRATION SERVICES LTD

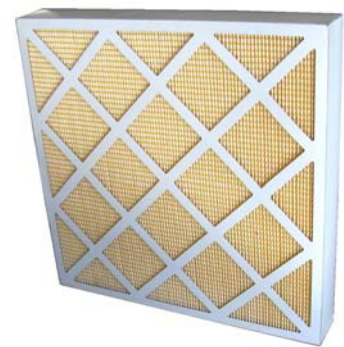

MANUFACTURERS AND SUPPLIERS TO THE HVAC INDUSTRY

COMPACT PLEAT PANEL FILTERS

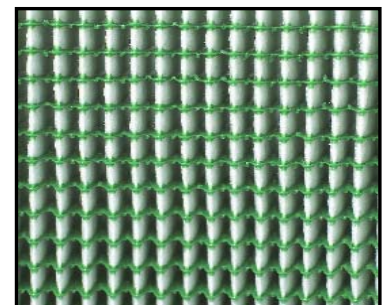

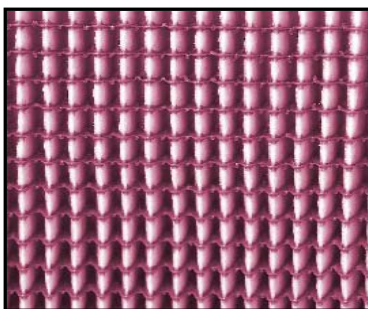

The CPP panel range is a durable, medium to high efficiency filter for conditions where air flow is high and space is restricted. The polypropylene compact rigid pleats are durable, efficient and anti-microbial. Its graded fibre density allows optimum dust holding capacity and low resistance. Separated by extruded polypropylene separators, the pleats allow even airflow throughout the whole media surface area.

Available in efficiencies from F6 to F9, 2" & 4" depths, in a choice of steel, plastic or card frame to suit different applications. Its self-supporting structure means no need for retainers or support bars. The totally safe, water-resistant and fire-resistant material makes it suitable for a wide range of applications from general HVAC to critical.

Fully incinerable.
