

# **FILTERMAX FILTRATION SERVICES LTD**

## **MANUFACTURERS AND SUPPLIERS TO THE HVAC INDUSTRY**

### **GLASS FIBRE FILTRATION MEDIA**

This most economical of medias has a wide range of uses where protection from large particle contamination is required. Available in a choice of oiled or dry.

Its continuous fibre formation has an open weave to allow particles to penetrate deep and evenly within the filter, giving long life and excellent retaining properties. A final 'scrim' gives protection against particle or fibre migration.

Common uses include

#### **General Heating, Ventilation and Air Conditioning (HVAC)**

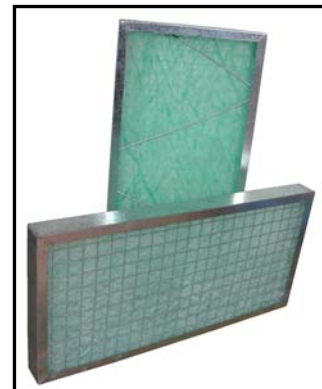

As a pre-filter to protect and extend the life of higher efficiency filters. Ideal for use with pad frames where moisture prevents the use of a card framed panel filter

#### **Paint booths**

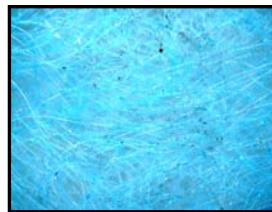

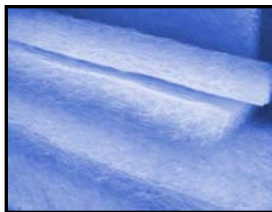

An economical and easy solution to paint over spray

#### **Auto-Rolls**

With prepared ends for use in applications with automatic hardware

Depths ranging from 12mm to 100mm in rolls or pre-cut pads.  
Rolls sizes from 400mm to 2m wide, 20m to 90m lengths
